Machine Learning Models and Evaluation

MLP Classifiers (sci-kit learn)

Artificial Neural Network (Keras)

TextBlob (sentiment analysis)

Recurrent Neural Network (LSTM)

Machine Learning Models and Evaluation

Tf-Idf Vectorizer

sklearn MLP accuracy score using Tfidf vectorizer is: 72.89 %

Keras neural network accuracy score using Tfidf vectorizer is: 72.94 %

Count Vectorizer

sklearn MLP accuracy score using Count vectorizer is: 73.24 %

Keras neural network accuracy score using Count vectorizer is: 74.48 %

TextBlob (sentiment analysis)

textblob accuracy score is: 42.75 %

Recurrent Neural Network (LSTM)

Machine Learning Models and Evaluation

(Classification reports – using Count Vectorizer)

MLP Classifiers

sklearn MLP accuracy score using Count vectorizer is: 73.24 %

	precision	recall	f1-score	support
0	0.76	0.70	0.73	5499
1	0.70	0.77	0.73	5640
2	0.78	0.76	0.77	5753
accuracy			0.74	16892
macro avg	0.75	0.74	0.74	16892
weighted avg	0.75	0.74	0.74	16892

Artificial Neural Network

Keras neural network accuracy score using Count vectorizer is: 74.48 %

	precision	recall	f1-score	support
0	0.74	0.71	0.73	5499
1	0.67	0.80	0.73	5640
2	0.81	0.70	0.75	5753
accuracy			0.73	16892
macro avg	0.74	0.73	0.73	16892
weighted avg	0.74	0.73	0.73	16892

Conclusion

- ❖ Most popular product in terms of total number of reviews is “Vulli Sophie Girrafe Teether”
- ❖ Majority of the product reviews fall in the positive reviews, which means most of products are working well for the customers, where customer reviews available
- ❖ “Vulli Sophie Girrafe Teether” is also one of the top 5-star rated – popular product
- ❖ “Graco Nautilus 3in1 Car seat” is another popular product in terms of positive ratings
- ❖ “Digital Video Baby monitor with Light Night vision” product had good number of positive reviews as well as neutral and negative ratings. So, it appears to be a product needing some improvements based on customer reviews.
- ❖ “Sony Baby call Nursery Monitor” and “Safety 1st Deluxe 4 in 1 Bath station” were the other products with the high number of negative review comments

Assumptions / Limitations

Assumption: all details captured correctly and no inaccuracies in ratings details listed in the dataset

Limitation : Majority of reviews (76%) were positive and about smaller portion was neutral (9%) or negative (15%). Capture additional reviews for better data balancing.

Future Usage / Recommendations / Ethical Assessment

Future use: The modeling approach can be reused for individual product level customer sentiments analysis or for capturing the customer sentiments for other product categories.

Ethical Assessment : No personal data collected for sentiment analysis. Any potential personalized information to be cleaned out prior to processing.
